- S2 - 19cm
- S3 - 20cm

■ **Inspira-te Explanation**

■ **ref. CARMEN** H: 21cm W: 21cm
D: 8,5cm

Carmen Miranda was a Portuguese-born Brazilian samba singer, dancer, Broadway actress, and film star who was popular from the 1930s to the 1950s. It was considered one of the biggest voices of Brazilian music, being an icon and international symbol of the country abroad.

Her image became the personification of a generic Latin American exoticism that was embraced as singular and peculiar by the US public and rejected as inauthentic and paternalistic by Brazilians. In fact, for all the stereotypes she faced throughout her career, her presentations made great strides in the popularization of Brazilian music, at the same time, opening the way to an increased awareness of the whole of Latin culture.

■ **ref. FK1701**

Frida Kahlo was a Mexican artist who painted many portraits, self-portraits, and works inspired by the nature and artifacts of Mexico. Inspired by the country's popular culture, she employed a naive folk art style to explore questions of identity, post colonialism, gender, class, and race in Mexican society. Her paintings often had strong autobiographical elements and mixed realism with fantasy.

Kahlo's work has been celebrated internationally as emblematic of Mexican national and indigenous traditions, and by feminists for what is seen as its uncompromising depiction of the female experience and form.

■ **ref. MARY**

Mary Poppins is a fictional character. A magical English nanny, Mary Poppins is a slightly stern but caring woman, who uses magic and self-control to take care of the Banks children. She is usually identifiable by her sensible hat and parrot umbrella which she brings with her wherever she goes on outings. She is kind towards the children, but can be firm when needed.

She is "practically perfect in every way." In this handbag Mary Poppins can visit Lisbon and all its wonders.

Cortiça - Escolha (Eco) lógica

^{PT} A Cortiça é a casca do sobreiro, uma árvore nobre com características muito especiais e que cresce nas regiões mediterrânicas sobretudo em Portugal, onde existem mais de 720 000 hectares de montado de sobreiro. A sua casca é extraída, fornecendo uma fibra vegetal versátil que pode ser utilizada em inúmeros objectos, enquanto que na floresta a árvore renova um outro ciclo de 9 anos findo o qual pode ser novamente descascada.

Mas é, acima de tudo, uma material cem por cento natural, reciclável e biodegradável, três atributos imprescindíveis numa sociedade como a atual que se deseja cada vez menos poluída e amiga do ambiente.

O saber dos nossos artesãos, a alta qualidade de uma matéria 100% natural, permite-nos criar uma coleção de acessórios de moda, vestuário, objectos utilitários, calçado e bijuteria, com um design actual, mas onde a tradição portuguesa não é esquecida.

CORK - Choice (Eco) Logical

^{EN} Cork is the shell of the cork-oak, a noble tree with very special characteristics, which grows mainly in Mediterranean regions, especially in Portugal, where there are over 720 000 hectares of cork oak forests. Its shell is extracted, providing a versatile vegetable fiber that can be used in many objects, while in the forest the tree renews another cycle of nine years after which it can be peeled back again. But it is, above all, a material one hundred percent natural, recyclable and biodegradable, three essential attributes in a society like the present, which you want less polluted and environmentally friendly. The knowledge of our artisans, the high quality of a material 100% natural, allow us to create a collection of fashion accessories, clothing, utilitarian objects, shoes and jewelry, with a modern design, but where Portuguese tradition is not forgotten.

Le liège – le choix (Éco)logique

^{FR} Le liège est la couche externe de l'écorce du chêne-liège (suber), un arbre noble de la région méditerranéenne, surtout du Portugal (plus de 720 000 hectares). Le liège est détaché de l'arbre de 9 en 9 ans et contient une fibre végétale qui peut être utilisée dans la création de nombreux objets. Mais le liège est surtout une matière cent pour cent naturelle, recyclable et biodégradable, trois qualités essentielles dans une société qu'on veut de moins en moins polluée et amie de l'environnement. Le savoir-faire de nos artisans et la haute qualité d'une matière 100% naturelle nous permettent de créer une collection d'accessoires de mode, de vêtements, de chaussures, de bijouterie et d'autres objets avec un design actuel, mais où la tradition portugaise n'est pas oubliée.
